DISCLAIMER

This document has been prepared by InfraPPP, part of IMC Worldwide, using information from our database of PPP projects. This document does not necessarily reflect the views of IMC Worldwide.

This research includes substantial market information and analyses on PPP projects recorded in InfraPPP's proprietary databases. The investment volumes and the number of projects presented in this report are not exhaustive, and correspond exclusively to the PPP projects of which InfraPPP keeps track. The investment volumes and dates are approximate and extracted from publicly available information.

Information gathered from several sources may have been used in the preparation of this document but was not independently verified by InfraPPP.

The document may be provided to third parties for informational purposes only and shall not be relied upon by third parties as specific professional advice or recommendations. Neither IMC Worldwide nor its affiliates or related entities shall be responsible for any loss whatsoever sustained by any party who relies on any information included in this document.

1. INTRODUCTION

1.1. Introduction

Brazil

Brazil has the largest PPP market by far in LATAM, representing a 50% of the total number of projects and a 45% of the total investment volume in the continent.

In the last years, the environment for public-private partnerships (PPP projects) in Brazil has evolved positively. The Government created the Investment Partnerships Programme in 2016 and the Project Support Fund in 2017, demonstrating political support for private investment in infrastructure.

In 2016 there was an abrupt restructuring of the Brazilian PPP market, favoring medium-sized companies and international participation. In 2019 investment in PPP projects reached USD 2.6 billion, after USD 0.5 billion in 2018 and USD 3.6 billion in 2017.

1.2. GDP per capita. Brazil

USD and growth (%). 2012 – 2020F

The economic evolution of Brazil has been irregular during the last years, with a decrease of 9.7% in the GDP per capita in 2018. However, there are signals of growth for the following years with prospects of 1.8% growth for 2020.

1.3. Infrascopes

PPP score. Brazil, 2019 (1-100)

Overall score	72
Regulatory framework	63
Institutional framework	88
Operational maturity	74
Investment climate	74
Financial Facilities	63

Brazil performed well in the Institutional Framework, Operational Maturity and Investment Climate on PPP projects. However, Regulatory framework and Financial Facilities for infrastructure are still developing throughout the region. In summary, average score (72 over 100) assesses Brazil as a developed* region for Public-Private Partnerships.

* Mature (80-100), Developed (60-79), Emerging (30-59), Nascent (0-29)

1.4. Procuring Infrastructure PPP projects

PPP Regulatory Framework score

Brazil, OECD, Latin America & Caribbean (LAC) and High-income countries

Brazil has solid scores in PPP Procurement and Contract Management (above LAC, OECD and High-Income countries). PPP Preparation and Unsolicited Proposals have both still room for improvement.

Note: The possible scores range from 0 to 100. The economies with the highest scores, nearing 100, are considered to have a PPP framework that is closely aligned with international PPP good practices.
